

Test laboratory for the fire behavior of building materials, Dipl.-Ing. (FH) Andreas Hoch
Testing, supervising and certifying body, authorized by the building supervision authority

TEST REPORT

PZ-Hoch-180320-3

for the proof of Fire behaviour according to DIN 4102, part 1

Translation of the German test report – no guarantee for translation of technical terms

company	Vescom B.V. St. Jozefstraat 20 NL-5753 Deurne
description of samples	fabric consisting of 100% Polyester FR colour: grey
name of the material	„Burton 7056“
sampling	by the company itself
content of request	Proof of flammability to classify building materials to class B1 “schwerentflammbar” according to DIN 4102, part 1
validity of test report	29.02.2028
result	The examined product meets the requirements of class B1 for “schwerentflammbare” (hardly flammable) building materials according to DIN 4102, part 1 (May 1998) , suspended freely or with distance of >40 mm to same or other plain materials.

This test report includes 4 pages and 4 enclosures.

This test report replaces the test report PZ-Hoch-180320-2 from 26.03.2018.

The prolongation of the test report is based on annual surveillance tests.

Remark: If the above mentioned building material is not used as product according to MBO § 2, Abs. 9, Ziffer 1, there is no need for a general building supervisory test report.

This test report is not valid if the examined building material is used as product in the meaning of state building prescriptions (MBO § 17, Abs. 3).

This test report does not replace an eventually necessary proof of applicability concerning building supervisory or building laws in the meaning of state building prescriptions. This has to be verified by:

- “allgemeine bauaufsichtliche Zulassung” (general building inspectorate approval) or by
- „allgemeines bauaufsichtliches Prüfzeugnis” (general building inspectorate certificate) or by
- “Zustimmung im Einzelfall” (exceptional approval)

This test report can underlie building supervisory procedures

- for regular building products for the prescribed proofs of conformity
- for non regular building products for the needed proofs of applicability.

This test report must not be published and copied without preceding agreement of the test laboratory and if agreed, only during validity and unchanged concerning appearance and contents.

1. Description of test material in condition as delivered

PN 27120: **“Burton 7056”** colour: grey
fabric consisting of 100% Polyester FR
side A: a little bit rougher weave structure
characteristic values determined by the test laboratory:
area weight: about 532 g/m² thickness: about 1,07 mm

The testing laboratory is not provided with further details concerning composition of the tested building materials. Samples are deposited.

2. Preparation of samples

The samples were kept in climate chamber 23/50 until they reached constant weight.

3. Arrangement of samples mounting: freely suspended

#1067	flaming side A in warp direction
#1069	flaming side B in warp direction
#1070	flaming side A in weft direction

4. Date of test CW 12 in 2018

5. Results The test has been examined according to DIN 4102 (Mai 1998)

¹⁾ indication of times: from the begin of testing procedure

²⁾ checked off if applicable

³⁾ indication of carrier/foam layer separated in case of fire-proofing agents

⁴⁾ very strong development of smoke

6. Explanations concerning the testing procedure

There were no additional tests proceeded because of the residual length of \geq than 45 cm.

7. Summary of results and additional establishments to Fire Behaviour

line no.	measurement	Result with the tested specimen					dimension
	test-no.	#1067	#1069	#1070	---	---	
	flamed direction flamed side	warp A	warp B	weft A	---	---	
1	residual length	60	73	64	---	---	cm
2	max. smoke temperature	105	111	111	---	---	°C
3	density of smoke - integral	1	1	1	--	--	%min
4	remarks: none						

According to DIN 4102, part 1, "schwerentflammbare" (hardly flammable) building materials must meet the requirements of class B2.

Pursuant to additional tests in the ignitability apparatus this can be determined (appendix 4).

8. Special remarks

- This report is only valid for the material as described under paragraph 1. In combination with other materials or with additional coatings or grounds etc. the burning behaviour may differ.
- This test report is not valid for the exposure to outdoor climate conditions.
- This test report is not valid, as soon as the fabric is used as a building product in the sense of the "Landesbauordnungen" (state building requirements, MBO § 17, par. 3).
- This test report is no substitute for a General Building Inspectorate Certificate.
- This test report is granted without prejudice to the rights of third parties, in particular private proprietary rights.
- For legal interests only the German original version is relevant.
- In General Building Inspectorates procedures this test report can be based for
 - regular building materials for the required proof of accordance
 - for not regular building materials for the required proof of applicability

9. Validity

This test report is valid until the mentioned date on page 1. The test report becomes invalid in case the standards on which the tests are based are changed.

Fladungen, 19.07.2023

clerk in charge:

(Dipl.-Ing.(FH) Jürgen Hammer)

Head of the test laboratory:

(Dipl.-Ing.(FH) Andreas Hoch)

„Brandschacht“-test #1067

measurement

#1067, PN27120: VESCOM, "Burton 7056", A+K

Max. flue temperature: 105°C, Smoke density integral: 1%/min

Residual length: 60 cm

„Brandschacht“-test #1069

measurement

#1069, PN27120: VESCOM, "Burton 7056", B+K

Max. flue temperature: 111°C, Smoke density integral: 1%/min

Residual length: 73 cm

„Brandschacht“-test #1070

measurement

#1070, PN27120: VESCOM, "Burton 7056", A+S

Max. flue temperature: 111°C, Smoke density integral: 1%/min

Residual length: 64 cm

**Test for normal flammability
classifying B2 according to DIN 4102**

 1. Description of test material in condition as delivered look at page 2

 2. Preparation of samples

Out of the material there have been cut samples for the ignitability apparatus.
The samples were kept in a climate 23/50 until they reached constant weight.

 3. Arrangement of samples -freely suspended-

Flaming in warp and weft direction / side A and side B

 4. Date of test CW 12 in 2018

 5. Results

"Burton 7056": flaming side B in warp direction	edge-test						surface-test						Dim
samples no.	1	2	3	4	5	6	1	2	3	4	5	6	
ignition ¹⁾	1	1	1	1	1	--	5	--	--	--	--	--	s
