Inhalation protection
Respiratory protection is not required. Use ABEK type gas masks in case of irritating exposure. If necessary, use with sufficient exhaust ventilation.

Skin protection
Handling with nitril gloves (EN 374). Breakthrough time: >480’. Material thickness: 0,35 mm. Thoroughly check gloves before use. Take of the gloves properly without touching the outside with your bare hands. The manufacturer of the protective gloves has to be consulted about the suitability for a specific work station. Wash and dry your hands.

Eye protection
Keep an eye-rinse bottle within reach. Tight-fitting safety goggles. Wear a face shield and protective suit in case of exceptional processing problems.

Other protection
Impermeable clothing. The type of protective equipment depends on the concentration and amount of hazardous substances at the work station in question.
