

# Vescom completes the curtain fabric collection

## New refined basics

---

### Press Release

Deurne, October 2017

**The transparent curtain fabric collection of Vescom is now complete with the arrival of Fogo, Chira and Clare. Three refined basics in a broad colour series. They are floor-to-ceiling, fall flexibly, are very interesting from a pricing perspective and are easy to apply. A must have for any interior.**

**Fogo** is the successor of the successful Vescom Zembra product. The vertical structure of this fabric is characterised by a graphic nature that has a subtle sheen. The 16 metallic tints in which Fogo is available will simply look perfect in any room.

curtain – design Fogo

The famous **Chira** has been fully updated in relation to colour. The new colour series (32 colours) includes more natural grey midtones and various white hues. The series has also been enriched with a few new accent colours such as soft lime, ash blue and powder coral.

The weave structure of **Clare** shows layering with a beautiful sheen as the finishing touch. The metallic colours range from gold, silver and bronze to copper, brass and gunmetal.

The three new Fogo, Chira and Clare curtain fabrics are floor-to-ceiling and can therefore be made without seams. The flexibly falling, refined basics can be easily applied and will lift any room to a higher level.

### **broad programme**

The designs form a valuable addition to the curtain O3 binder. The curtain fabric collection consists of plain, patterned, black-out, dim-out and (acoustic) translucent curtain fabrics. The fabrics are lightfast, colourfast, flame retardant, safe, functional, durable and, in many cases, washable at high temperatures. To conclude, all fabrics are Oeko-Tex certified.
