

Vescom curtain fabrics inspired by nature

Appealing, soft and comfortable

Press Release

Deurne, January 2018

Vescom is enhancing its collection with curtain fabrics inspired by nature: Liran, Faray and Mioko. All three have a warm, natural look and an extensive colour pallet. Thanks to the organic and natural features, the fabrics can be perfectly combined with the new wallcovering designs Onari, Greenbo and Millwood. Together, they form a stylish and natural whole and create a warm and comfortable atmosphere!

Liran has a woolly soft look as well as a beautiful sheen. The fabric is available in 15 light natural and powder tones and can easily be used in every project interior.

curtain – design Liran

Mioko remains a solid basic product, well-known for its soft look and lovely, elegant sheen. The new colour pallet with a choice of 33 colours offers a welcome variety of light shades. The neutrals are alternated with cool uni colours, grey nuances and fashionable colours.

Faray is well-known for its natural and organic look. The completely new colour pallet with 18 shades is characterized by a vertical organic pattern inspired by nature. The fabric is reversible, which makes Faray extra special!

broad programme

The designs form a valuable addition to the curtain 01 binder. The curtain fabric collection consists of plain, patterned, black-out, dim-out and (acoustic) translucent curtain fabrics. The fabrics are lightfast, colourfast, flame retardant, safe, functional, durable and, in many cases, washable at high temperatures. To conclude, all fabrics are Oeko-Tex certified.
