

8 advantages of vinyl wallcovering + Vescom Protect

maintenance-friendly

Vescom Protect is easy to clean with regular household agents, Vescom Cleaner and strong solvents. The wallcovering even resists the most potent anti-dirt agents without any wear & tear to the product. Furthermore, vinyl wallcovering + Vescom Protect can be cleaned faster and more thoroughly than any other wall finish product, limiting maintenance costs to a minimum.

stain-resistant

Vescom Protect is a transparent protective foil that attaches to the vinyl wallcovering. This foil makes the walls absolutely resistant against stain and dirt of any nature. Even notorious substances that usually leave stubborn stains (such as iodine, silver nitrate, ballpoint ink and paint) can be removed easily and completely.

sustainable and scratch & impact resistant

Thanks to the excellent resistance against stains, vinyl wallcovering + Vescom Protect easily last for 10 – 15 years. A test was carried out on the scratch + impact resistance of this combination and on the vinyl wallcovering only. The combination of vinyl wallcovering + Vescom Protect scored no less than 33% higher! This is an important advantage, when used in rooms with a lot of activity, just as the fact that vinyl wallcovering + Vescom Protect bridges shrinkage and hair cracks in the wall.

worthwhile investment

From a financial point of view as well, everything is in favour of selecting of vinyl wallcovering + Vescom Protect. Sometimes, the initial costs are even lower than the costs of similar wall finish products. Just lacking the need to carry out maintenance such as painting makes vinyl wallcovering + Vescom Protect an economically worthwhile investment.

keeps its aesthetic value

The Vescom Protect foil is transparent and invisible. That way Vescom vinyl wallcovering retains its aesthetic value. Each quality product in the collection is distinctly a technically functional product, yet without the steel-cold appearance of many synthetic products.

continuous protection

Vescom Protect does not lose its effectiveness. Therefore, the foil used continuously provides optimal protection.

safe

The vinyl wallcovering + Vescom Protect is based on a safe, natural and non-toxic process. In addition, it is hypoallergenic.

the alternative for paint and glass fibre

Its long lifespan, hygiene and full ability to get things clean make vinyl wallcovering + Vescom Protect an excellent alternative for paint and glass fibre.

Vescom Protect

protects walls against dirt, chemicals and bacteria

VESCOM

Vescom Protect because hygiene is of crucial importance in healthcare

In the healthcare sector, it is of vital importance to have clean and hygienic rooms. After all, such an environment directly impacts the health of those people that are in these rooms. Removing dirt and eliminating harmful bacteria prevents people from becoming infected. No doubt, your organisation takes every conceivable measure to clean and disinfect rooms. However, you also know that dirt and bacteria lodge in the most unlikely places. That's the reason why we offer you Vescom Protect: The surface treatment that protects your vinyl wallcovering against dirt, chemicals and bacteria. Wallcovering including Vescom Protect is extremely suitable for rooms that demand the highest standard in hygiene. This applies to operation/surgery theatres, patient rooms, IC departments, laboratories and institutional kitchens.
