

Cleaning instructions

vinyl upholstery

April 2016

general

- For normal maintenance and removing contaminants, always use a cloth that does not give off fluff.
- Test the colourfastness and material resistance on an unobservable place.
- Use Vescom Cleaner for the best results.

normal maintenance

- Clean vinyl upholstery regularly with a dry or damp cloth.
If you use Vescom Cleaner, remove the residue of the cleaning agent with water and cloth.

contaminants

- It is advised to remove contaminants as soon as possible. Please note: jeans or textile dyes cannot be removed.
- Remove dry surface dirt by using a soft brush or cloth.
- Remove wet contaminants as soon as possible by absorbing them in a non-fluff absorbent material.
- Apply Vescom Cleaner by spraying directly on the upholstery or by using a cloth.
- In case of stubborn contaminants, apply Vescom Cleaner and let it soak in for a few minutes.
- Use a brush and a bit of force to remove the stubborn contaminants from the texture of the vinyl upholstery.
- Always work from inside to outside in order to contain the spot.
- After cleaning, remove the residues from the dirt and from the cleaning agent by using clean water and a clean cloth. Afterwards dry with a cloth.

warning

- Never clean vinyl upholstery with aggressive solvents or with scouring cleaning agents.
- Only clean vinyl upholstery with a glossy top layer using a dry or wet cloth. Using a brush may damage the top layer.
