

Technical information

Xorel textile wallcovering

June 2007

composition

Xorel wallcovering consists of 100% Xorel, or 100% polyethylene.

backings

Xorel wallcovering is available with two backing options: paper and acrylic backing (or no backing). Vescom delivers Xorel wallcovering with a paper backing as a rule.

- Paper backed: this is Vescom's standard backing and is recommended if Xorel is being used as a wallcovering.
- Acrylic backed: we recommend this if Xorel is being used for panel/upholstered walls (adhered) and for furniture upholstery.
- Unbacked: when using Xorel for unadhered panels and furniture upholstery, we recommend using no backing.

The width (and weight) of the material depends on the backing:

Paper backed (W)	± 52 inches / ± 132 cm
Acrylic backed (A)	± 54 inches / ± 137 cm
Unbacked (F)	± 56 inches / ± 142 cm

panel and upholstery

All of the items in the Xorel collection can be used as panel and furniture upholstery, too, with the exception of the Nexus pattern, which is not suitable for furniture upholstery.

flame retardancy

Fire test results are available on request.
